ShivamAgrawal

PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience building **React.js**, **Next.js**, and **TypeScript** frontend applications and real-time dashboards for enterprise clients. Proven track record improving application performance by up to **70%** through Redux, lazy loading, WebSockets, and virtualization, and integrating REST APIs with enterprise platforms including Salesforce, Zendesk, ServiceNow, and Amazon Connect. Experienced leading small development teams through Agile delivery, code reviews, and sprint planning. Actively exploring **Agentic AI**, **Multi-Agent Systems**, and **Generative AI** applications in frontend engineering.

SKILLS

- **Frontend:** React.js, Next.js, Vue.js, Redux, TypeScript, JavaScript, Context API, Tailwind CSS, HTML5, CSS3, FlutterFlow
- **Backend:** Node.js, Express.js, RESTful APIs
- **Programming Languages:** JavaScript, Python
- **Database & Query Language:** SQL, PostgreSQL
- **Tools & Version Control:** Git, GitHub, Docker, CI/CD, Figma, Playwright
- **Concepts:** System Design, Data Structures & Algorithms, OOP, Performance Optimization, Responsive Design, Agile

PROFESSIONAL EXPERIENCE

Software Engineer - Zuqo Technologies

Mar 2026 - June-2026 | Bangalore, India

- Developed AI-native frontend modules and real-time dashboards using **React.js** and **TypeScript**, delivering enterprise-grade solutions for customer intelligence and contact center operations
- Integrated REST APIs with enterprise platforms including **Zendesk**, **ServiceNow**, and **Amazon Connect**, optimizing application performance, scalability, and user experience

Software Engineer - Leapmile Robotics

Aug 2022 - Feb-2026 | Bangalore, India

- Led a small team of developers through code reviews, sprint planning, and Agile delivery, ensuring high-quality releases and on-time project execution.
- Developed responsive, real-time dashboards and smart locker applications using **React.js** and **TypeScript**, serving **100K+ users** across **6+ enterprise clients** and **4 user roles**.
- Improved application performance by **70%** using Redux, lazy loading, WebSockets, virtualization, pagination, throttling, and debouncing while implementing secure **REST API** integrations with **JWT authentication**.

KEY PROJECTS

Nano Warehouse Dashboard

Developed a nano warehouse dashboard for monitoring shuttle performance in real-time, which can be used by companies to track users, category logs, and performance for efficient problem resolution.

- Built a real-time warehouse monitoring dashboard using **React**, **TypeScript**, **WebSocket**, and **Redux** to track robot shuttle movements, inventory, logs, and user activities.
- Optimized the performance and scalability of the application by incorporating **pagination**, **lazy loading**, **Redux**, and **memoization** using **React.memo** & **useMemo** to prevent unnecessary re-renders of the UI.
- Developed live dashboards for robot status, category logs, and warehouse performance, enabling faster issue detection and operational monitoring.
- Integrated **REST APIs** and state management with Redux, delivering responsive data visualization and seamless real-time updates for enterprise warehouse operations.

Smart Locker

Developed a logistics smart locker web application with **4** user roles, allowing seamless booking, OTP-based verification, and efficient delivery management.

- Developed a customer-facing smart locker logistics application using **React, TypeScript, JavaScript**, and **REST APIs**, supporting secure parcel booking and retrieval.
- Designed and implemented role-based access control for **4 user roles** with protected routes and permission-based workflows.
- Built a secure **OTP authentication** system with OTP generation, verification, resend, and cancellation workflows to ensure safe parcel collection.
- Integrated backend APIs and optimized user experience through responsive UI, form validation, and error handling, improving booking reliability and reducing failed deliveries.

EDUCATION

Master of Computer Application - **MS Ramaiah Institute of Technology**

Jan 2021 - Aug 2022

Bachelor of Computer Application - **Teerthankar Mahaveer University**

Aug 2017 - Aug 2020

CERTIFICATIONS

- Python - **Training Basket**
- JavaScript & Reactjs - **Udemy**

AWARDS & ACHIEVEMENTS

- **Outstanding Contributor** - Recognized for managing diverse client requirements, ensuring smooth technical delivery, and preparing regular delivery reports
- **Move the Dot Award** - Recognized for delivering a complex application, leading ransomware incident response, performing root cause analysis, and resolving data exfiltration cases

AREAS OF INTEREST

- Cloud Computing
- Agentic AI
- Multi-Agent Systems
- Generative AI (GenAI)
